Customer Problem Statement :

Here's a **short and clear content (para)** for your **Customer Problem Statement – Smart Library Request Workflow**:

Customers (students and staff) face challenges in requesting library resources due to slow, manual processes, lack of real-time tracking, and limited visibility into book availability. This leads to delays, confusion, and a poor user experience. There is a need for a smart, automated workflow that simplifies requests, provides real-time updates, and improves overall efficiency and user satisfaction.

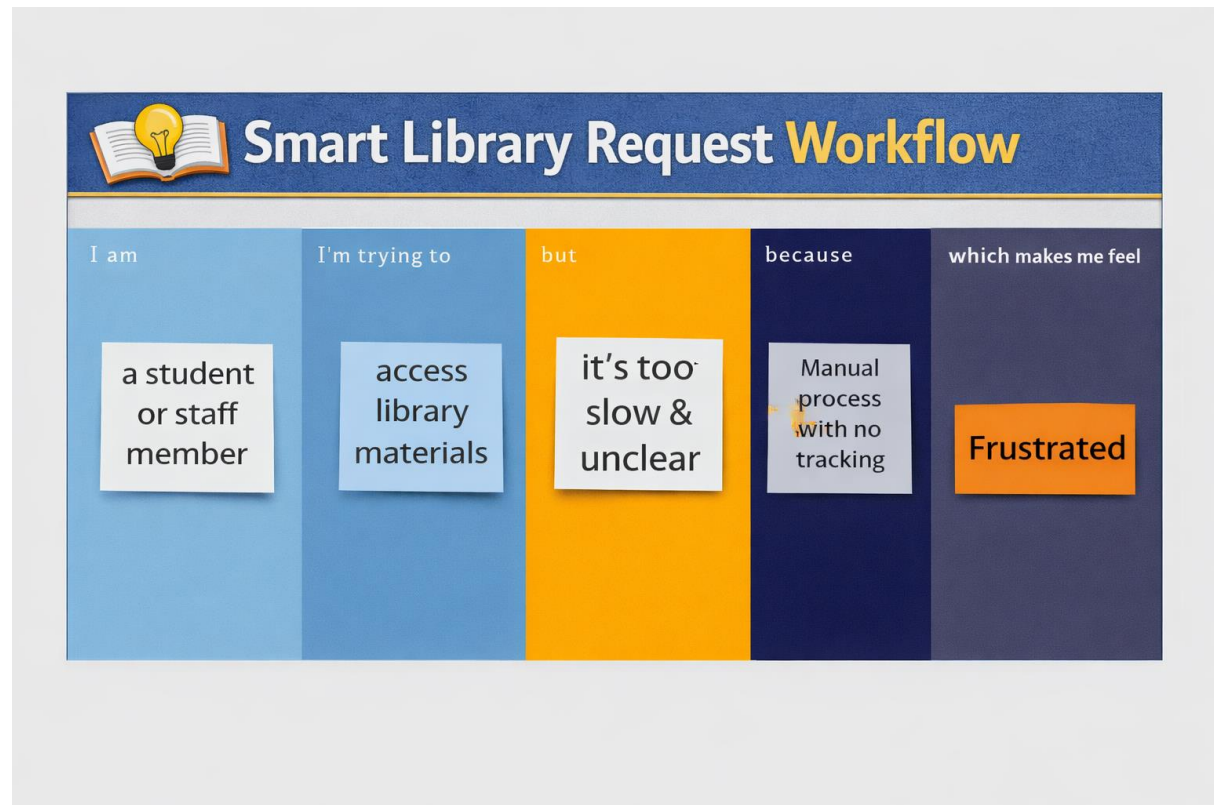

Smart Library Request Workflow

Customer Problem Statement: Smart Library Request Workflow

I am	A student or staff member needing to request books or resources
I'm trying to	Access library materials efficiently and conveniently
but	Slow and manual request process, lack of real-time tracking, limited visibility of availability
because	The current system is outdated and inefficient
which makes me feel	Frustrated, confused, and dissatisfied

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am (Customer): A student or staff member	Request and access library books/resources easily	The process is slow and lacks tracking	It is manual and not automated	Frustrated and confused
PS-2	A library user	Check book availability and request quickly	There is no real-time visibility	Inventory is not integrated with the system	Unsatisfied and delayed
